**Don't Trash Clinton City**

With warm weather upon us, there is a rash of garage sale and other signs being placed all over the City. Clinton City Ordinance Title 24 covers signs; § 24-3-1 lists prohibited signs. This section indicates that these miscellaneous signs and posters are not allowed within the City. These signs are very rarely if ever collected by the individuals putting them up and end up detracting from our otherwise beautiful City as trash and debris. City crews spend a great deal of time trying to make the City look good; please don't complicate their job with illegal signs. Individuals putting these signs up can be cited and fined for violation of the City Ordinance. Thank you!!

**2013 Water Restrictions are in place:**

Low snow pack totals for the winters of 2010/11 & 2011/12 have created a water shortage. It is necessary for citizens to conserve water. Please see attached flyer for more information.

Also, "please keep in mind that a connection between a pressurized irrigation system and the city's culinary water system is **prohibited**. If you have any questions, please call the public works office at 801-614-0870."

The Clinton City Police Department is seeking applicants for Citizens on Patrol. Citizens are urged to become members and help the Police Department be more proactive with crime prevention.

Applications are available at the Police Department 2209 N 1500 W or call 801-614-0819.

Come visit our Clinton City Fire Department at "Macy's Kid's Club" from 10-11am June 27<sup>th</sup> for a "Safety Fair". Remember "Flag Day" is June 14<sup>th</sup> at Macy's in Clinton.

**Have a GREAT summer!**

Memo to: Municipality of Clinton City using secondary water.

From: Davis and Weber Counties Canal Company.

Date: May 1, 2013

Subject: 2013 Water Shortages.

The Davis and Weber Counties Canal Company (DWCCC) has made a determination that WATER SHORTAGES are inevitable for the water year 2013. This is due to low snow pack in the high mountain elevations during the winter season of 2012 - 2013, the past drought of 2012, the Echo Reservoir Safety of Dams construction, and low reservoir storage water carryovers. The water shortages for 2013 could be as much as 25% to 40% less water available than last year for the 183 day outdoor irrigation water season.

We are asking ALL residential users to water two times a week for 20-30 minutes between the hours of 6:00 P.M. to 10:00 A.M. We want to follow a watering days schedule as follows:

House numbers that end in 0, 1, 2 or 3 will water only on MONDAY AND THURSDAY of each week.

-As an example 1590, 2001, 1492, 1913

House numbers that end in 4, 5 or 6 will water only on TUESDAY AND FRIDAY of each week.

-As an example 1814, 1925, 1776

House numbers that end in 7, 8 or 9 will water only on WEDNESDAY AND SATURDAY of each week.

-As an example 2217, 1948, 1999

A PLAN should be submitted to the company office for any city park or parks within the DWCCC service area showing compliance of 25% decrease in water use.

If voluntary compliance is not observed two things will happen.

1. Those who abuse the water restriction policy or waste water will have their irrigation systems "locked down" for a period of time until they can show how they will comply. A fee will be charged for removal of the lock.
2. If there is not sufficient compliance, we will run out of water possibly by mid-summer.

Window tags will be issued from the canal company office for special circumstances such as new sod or new landscaping.

Davis and Weber Counties Canal Company would like to thank EVERYONE for their voluntary conservation efforts.

## Conservation Tips

### **Fun Water Fact**

If you covered a football field with one foot of water, it would be about 325,851 gallons. This volume of water is also referred to as one acre-foot. The average quarter acre lot in Weber and Davis Counties uses about 250,000 gallons in a season for landscape irrigation, but only requires less than ½ that to actually maintain it to the high standard that is expected to have green healthy lawn.

### **Indoor Water Conservation Tip**

Use a water-efficient showerhead. They're inexpensive, easy to install, and can save you up to 750 gallons a month.

Turn off the water while you brush your teeth and save 4 gallons per minute. That amounts to 200 gallons a week for a family of four.

### **Outdoor Water Conservation Tips**

Avoid watering between 10:00 am and 6:00 pm and when it is windy.

Water dry or brown spots in your lawn by hand with a hose rather than running your sprinkler system. This will take care of the brown spot while saving thousands of gallons in not overwatering the rest of the entire lawn to take care of the same brown spot.

### **Water Conservation Activities**

Saturday, June 15<sup>th</sup> 6:00 - 7:30am Free Class "Trees and Shrubs" (Traveling Tour)

(For a full class schedule and other water conservation information go to [www.weberbasin.com/conservation](http://www.weberbasin.com/conservation). Classes are located at Weber Basin Water Conservancy District's Learning Garden located at 2837 E. Highway 193 in Layton)
