#### FIREWORKS SAFETY

For many in Utah, the use of fireworks has become a tradition. The beautifully colored sparks fly through the air in concert with thunderous reports. As exciting as this may seem, people often forget that they are playing with explosive materials, dangerous chemicals and combustibles that can destroy property, harm or cause death to unsuspecting victims. These deceptively simple objects explode, throwing unburned powder, hot sparks and embers through the air at high velocities and often create temperatures hotter than 1,200 degrees Fahrenheit.

In Utah from 2002 to 2006, 367 fireworks related fire incidents were reported, resulting in over \$490,000 loss. The safest way to enjoy the thrill of fireworks, pyrotechnic displays and flame effects is to let the professionals handle these products and attend a public fireworks display, a concert where pyrotechnics react to show design, or professional community displays. For fireworks enthusiasts who enjoy shooting their own this year, there have been some significant changes in Utah fireworks laws that go into effect this fireworks season. Please pay particular attention to safety recommendations and safety tips from manufacturers and retailers who sell fireworks. Reading instructions this year will be significantly important and necessary to help reduce the chances of a destructive fire or debilitating injury.

- Purchase fireworks from reliable, licensed fireworks dealers. Read all instructions to reduce the chances of a destructive fire or debilitating injury.
- Follow all safety guidelines exactly. Children should not handle fireworks. You must be at least 16 years of age to handle or light fireworks. Adults are to supervise any activity that includes fireworks.
- Never let children handle, play with or light fireworks. Only knowledgeable and clear-headed adults should handle fireworks.
- Adults should never use alcohol or drugs or be impaired while engaged in handling, using, placing or lighting fireworks.
- New aerial type fireworks are now lawful. Aerial devices, also known as "multiple tube", "repeater", or "cake" fireworks often look like miniature professional displays and can travel high into the air, as much as 150 feet.

Please remember State Law allows the discharge of fireworks 3 days before and 3 days after the 4<sup>th</sup> and 24<sup>th</sup> of July between the hours of 11 a.m. and 11 p.m. except on July 4<sup>th</sup> and July 24<sup>th</sup> the hours are 11 a.m. to Midnight. You can also discharge fireworks on New Year's Eve and Chinese New Year between the hours of 11 a.m. and 1 a.m. Rising temperatures and low humidity = prime fire conditions. Please be aware of your surroundings and use common sense while using fireworks. Have a safe and happy holiday celebration.
